

Newman Lake Integrated Aquatic Vegetation Management Plan

**Final
October 2005**

**Prepared and Funded by
Newman Lake Flood Control Zone District
Spokane County Division of Engineering and Roads
1026 West Broadway Ave.
Spokane, WA 99260-0170
(509)-477-7443**

Acknowledgements

I want to extend my special thanks to the following individuals and organizations that have made my job and the effort of controlling Eurasian watermilfoil at Newman Lake much easier:

BiJay Adams, Liberty Lake Sewer and Water District for a variety of invaluable support including identifying our first Eurasian watermilfoil plants, providing information on Liberty Lake's experiences controlling milfoil and generously allowing liberal use of portions of the Liberty Lake Aquatic Weed Management Plan for this report.

Dr. Barry Moore, Department of Natural Resource Sciences at Washington State University, for his time and expertise in controlling Eurasian watermilfoil at Newman Lake including numerous hours on the boat and SCUBA diving for surveys and hand pull control efforts.

Kathy Hamel and Washington State Dept of Ecology for providing financial support and extensive technical and management information with their Aquatic Plant Management Program and web site.

Newman Lake Flood Control Zone District Advisory Board and Newman Lake Watershed Committee members for their wise input and support in implementing this new program at Newman Lake

Sutton Bay Resort and Cherokee Trading Post Resorts for use of there facilities and boats over the last two years of milfoil control efforts at Newman Lake

And most importantly....

Newman Lake Community for their involvement and concern and support of the Eurasian watermilfoil control efforts, their willingness to learn, and patience through water restrictions.

Marianne Barrentine, PE
Newman Lake Engineer
